

December 2021

NO.15

Science Island Express

The Science Island Express delivers the most recent big things happening at HFIPS.

AGRICULTURE

HFIPS researchers bred a new kind of rice with brittle and nutritious stem which makes it much easier for straw returning and ensilage but will not be beat down by even strong wind.

HFIPS study team developed non-invasive skin cholesterol detection system scanning skin to monitor Low-density lipoprotein cholesterol in a rapid and pain-free way.

HEALTH

CFEC 2021

China Fusion Energy Conference kicked off on Dec.5 in Hefei drawing hundreds of Chinese fusion scientists to attend.
