Science Island Express

The *Science Island Express* delivers the most recent happening at HFIPS.

EXPLORATION

HFIPS researchers developed a deep-sea mass spectrometer for in situ dissolved gases detection followed by several tests in real working scenario, South China Sea, supporting China in its movement forward in deep-sea exploration.

ENVIRONMENT

A mobile shipborne mass spectrometry was constructed by HFIPS research team to image spatiotemporal distribution of volatile organic compounds realizing rapid on-line detection.

SCI-TECH KIDS CAMP

HFIPS kicked off its second Sci-Tech Kids Camp, an all-through summer vacation activity for employees' children, in an effort to set up a successful support structure for its workforce.
