Important information about corresponding authors

The corresponding author will communicate with Elsevier during the editorial process. Their institution determines if any publishing agreements are applicable, which can affect the price of publishing open access and who pays. Use their main institution, not their department.

This selection does not prevent additional corresponding authors from being referenced in the final published article.

Changing authors at revision

Only in exceptional cases can authors be changed after the manuscript is accepted for publication. Please review the instructions for changing authors at revision.

Any change requires a completed form for your revision submission.
